B3DTIME Transparency Report
February 2026

Transparency has always been one of the core values behind B3dtime. Since the very beginning of this journey in early 2025, our mission has remained simple and consistent: helping people improve their sleep habits while rewarding healthier, more sustainable routines.

As we move further into 2026, we want to openly share where the project stands today, how resources are being used, and the positive impact we are creating together.

Quick recap of our journey

From a simple idea to a fully operational Mainnet dApp:

Project Birth

Envisioned in January 2025 to encourage sustainable sleep habits through the VeBetterDAO mission.

Community Approval

Our grant proposal received official support on 28 July 2025, confirming strong belief in B3dtime's mission.

Testing & Optimization

Testnet launched on 1 August 2025, followed by an open testing phase with 100 external users who helped us refine and improve the dApp.

Mainnet Launch

Successfully launched on Mainnet on 20 October 2025.

This journey would not have been possible without the community's support and feedback.

Impact by the numbers

Here is where we stand today:

Users Joined

Nearly 500 users have joined B3dtime

Hours Logged

More than 150,000 hours of sleep logged

B3TR Distributed

Over 120,000 B3TR distributed to users

Tons CO2 Saved

Approximately 2,800,000g (2.8 tons) of CO2 saved

On-Chain Actions
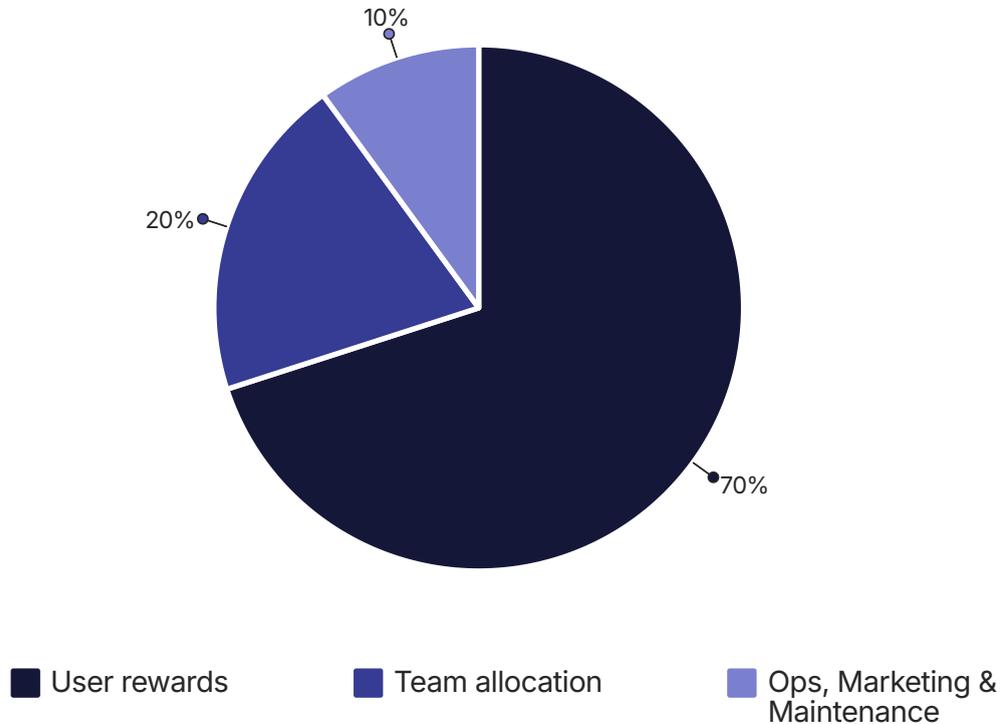

Over 23,000 on-chain actions recorded

ⓘ Every minute of sleep saves ~0.306g of CO2

Behind every number is a real person building better sleep habits and a healthier lifestyle.

Financial transparency

We manage project resources with long-term sustainability and accountability in mind.

Token allocation (as approved in our grant proposal):

- ■ User rewards
- ■ Team allocation
- ■ Ops, Marketing & Maintenance

Funding & treasury overview

Grant & Spending

- Total grant funding received: **144,916 B3TR**
- Operational spend (Aug 2025 – Feb 2026): **44,132 B3TR**
- Ops/Marketing/Maintenance allocation: **17,298 B3TR**
- Current treasury balance: **137,250 B3TR**

Additional treasury support

B3dtime also benefits from GoatzClub NFT royalties.

50% of all royalties go directly to the B3dtime treasury.

So far, this has added **31,785 VET**.

> We would also like to clearly state that no $B3TR tokens received from grants or weekly allocations have been sold.

Looking Ahead

While we are seeing steady growth in weekly voters, user growth has been slower than originally planned. We understand that this is mostly due to the wearable requirement needed to track sleep, which also helps keep our dApp free from farming.

We had the option to open tracking to both wearable and mobile users to grow faster, but after careful consideration we chose not to change this requirement. Our goal is to keep B3dtime clean from farming and continue rewarding real users and genuine engagement.

Our next focus areas

Leaderboards	Achievement badges	Referrals	Gamification
Introduce competitive leaderboards to foster healthy competition and boost user engagement.	Unlock new achievement badges for reaching milestones and consistent participation, providing recognition and motivation.	Implement a referral program to encourage existing users to invite new, genuine users to the platform.	Integrate further gamified elements into the B3dtime experience to make tracking sleep more fun and rewarding.

Support & known limitations

We are aware that some users experience issues with the Withings sleep tracking integration on certain smartphone and wearable combinations. Unfortunately, this is outside of our direct control as it depends on the Withings ecosystem.

To help, we can recommend a few wearables we have personally tested and confirmed to work reliably on both Android and iOS. Our team actively helps users resolve most setup issues through our Discord – if you ever run into problems, please open a support ticket and we will gladly assist you.

> **Special shout-out to Virus**, our community moderator, who has become a core part of the B3dtime community and a key contributor to the project. From troubleshooting user issues to helping newcomers get started, his contribution has been invaluable and many user problems are resolved thanks to his dedication.

Thank you

B3dtime exists because of this community. Every user, voter, tester and supporter is helping us build a healthier world — one night of good sleep at a time.

If you believe in our mission, the best way to support us is simple: keep using B3DTIME, remember to cast your weekly vote for our dApp (via VeBetterDAO or VeDelegate), share it with someone who could benefit from better sleep, and continue being part of this journey with us!

The B3DTIME team

Oroborus, Artio, Dusty, Meinhart

> Together, we're building a healthier world — one night of good sleep at a time.
